Education and Professional Development

Grant, Merit & Exploration Programs (Kindergarten-12th grade)

The Education Program started in the Fall of 2005, providing scholarships for tribal members attending college. That program has now expanded to include educational opportunities for tribal members of all ages.

The General Membership has decided that in order to help tribal members gain admission to college, we must help them early in their education. Funding is available to the youth for tuition assistance in preschools, private schools, tutoring, test preparation courses, and many other learning opportunities.

Vocational, 2 Year, 4 Year & Graduate Programs

Our education program offers college and vocational scholarships for students attending an accredited institution for higher learning. This year, the tribe has 18 members receiving funding for higher education. Ten of these tribal members are working towards an associate degree at a junior college. Additionally, eight members are working at the university level towards their bachelor's degree. All of these students have made a serious commitment with the tribe to make the most of the tribe's investment.

From our tribal elders to our future leaders, Dry Creek Rancheria places great value on our people.
